an outer race in surrounding relationship to the inner race, said outer race having interiorly an annular groove;
rolling elements rolling between the inner and outer races; and
a single-piece T-shaped ring formed with an annular rib for securement in the annular groove of the outer race and projecting out from the outer race so as to form engagement surfaces for neighboring rolling elements and thereby being capable to absorb forces applied by the rolling elements in an axial direction;
wherein the ring is breached by a slot to impart resiliency to the ring.

Claim 17 has been canceled.
